FULL STACK DEVELOPER
SOFIA PARRA

✉ sofiaparraweb@gmail.com

ABOUT ME

Full Stack Developer seeking first job in the field. Experienced in Front-end and Back-end project development. Knowledge in GIT, agile methodologies, data structures, algorithms, and CSS frameworks.

My previous experience has provided me with the opportunity to develop skills in leadership, effective communication, and teamwork. Quick adaptation to change and constant pursuit of challenges.

WORK EXPERIENCE

HENRY: Teaching Assistant | April/May 2023

Coordinated a group of students to facilitate their integration into the study team, assisted in solving exercises, promoted group collaboration (Pair Programming), and proposed ideas to improve Bootcamp processes.

Content Creator | 2018 - 2022

Managed social media platforms, creating engaging content to increase brand recognition and encourage user engagement. Demonstrated strong communication and creativity skills.

Work and travel | 2019/2020 - 2021/2022

Summer work experience in the United States for two seasons. Developed communication skills in a multilingual and multicultural environment.

PROJECTS

Landing Pages for Restaurants| Dic/Jan 2024

Crafted restaurant landing pages using HTML, CSS, JavaScript, React for enhanced user experience and engagement

Dona Tuc | Dic/Jan 2024

A Node.js and React-based donation platform connecting users with NGOs. Prioritized user-friendliness and transparency.

Book E-commerce | July/August 2023

Created a fully functional e-commerce platform for books, featuring payment integration, dynamic cart management, intuitive sorting, review functionalities, and personalized favorites. Tech: Express, React, Node.js, Redux, JavaScript, SQL.

La Gruta Foundation | June 2023

Developed a feature-rich NGO app with authentication, dynamic searches, filters, sorting, user management, email automation, and payment integration. Tech: Express, React, Node.js, Redux, JavaScript, SQL.

Pokemon App | April/May 2023

Designed a Pokemon app using external APIs and a custom database. Implemented searches, filters, forms, sorting, and CSS styling without external libraries.
